lockers for frozen, refrigerated or hot food

Sections & Plan view

Key benefits

Models for refrigerated, frozen, hot and non-refrigerated food products.

Modular, plug-in design that's easy to install and configure in sets of 2 columns, plus technical column.

4 locker sizes - S, M, L and XL (not available for all models).

Electronic/manual locking automatic opening and LED indicator and key for manual unlocking.

Solid stainless steel construction inside and outside.

Built-in R290 compressor unit.

Heated model with independent temperature control per locker for greater energy saving.

Light and/or sound door opening indicators.

Easy to use, simple and intuitive, different opening technology options on request.

Remote control and monitoring. Can be integrated with the retailer's app.
